| Team members | Nisha C, Fathima D, Harni V, Sangeetha M                       |

The screenshot displays the Node-RED web application interface. The main workspace shows two flows. The top flow, labeled 'Flow 1', contains a 'Medicine' node connected to a 'function' node, which is then connected to a 'Cloud' node. A 'msg.payload' node is also connected to the 'function' node. The bottom flow contains a 'timestamp' node connected to a 'medicine' node, which is then connected to a 'function' node. This 'function' node is connected to an 'IBM IoT' node (labeled 'connected') and a 'msg.payload' node. The interface includes a left sidebar with a node palette, a top navigation bar, and a right sidebar with flow information and an export button.
